ASSIGNMENT-II (ON WINDOWS EXPLORER)

- Open windows Explorer.

Right click on 'START' menu. A popup menu will be displayed select Explore & click on it .

- Highlight one folder and see the contents under this folder.

On single click on a specific folder, we can highlight a folder and can see the contents of that folder on the right pane.

- Use split bar to make left pane as big as possible.

Pressing left button of the 'MOUSE' on the SPLIT BAR and DRAG it to the right side one can be make the left PAN as big as possible.

- View and off the STANDARD TOOLBAR.

We click on view menu from menu bar. A drop down list displayed. Choose TOOLBARS and then click on standard button. If it was OFF, Then it become on otherwise it becomes OFF.

- Show and hide STATUS BAR.

We click on view menu from the menu bar of the explorer. Then choose STATU BAR option and click on it to view the STATUS BAR is not there. Then again selecting view menu from the menu bar and click on it one can hide the STATUS BAR.

- Off the address bar and set Explorer window as web page.

We click on view menu from the menu bar of the Explorer. Then choose TOOLBARS option and then choose address bar option & click on it off the address bar if address bar is on. Choosing view menu and then choosing as web page option from the popup menu of view we can set Explorer window as web page.

- Expand the windows folder and MS-WARD application File.

Opened the windows Explorer and located the windows File. Then selected MS-WORD from it.

- Click on the HARD DRIVE and DISPLAY the details of the contents.

We click on the 'HARD DRIVE' like C:, D: or E: We can see the name & icon of that drive and all folders and files which that particular drive holds.

- Sort the FOLDER CONTANT as the ASSSENDING ORDER OF NAME.

We choose view menu from menu bar. Then choose arrange icon from the drop down list and finally click on by name option from the sub menu.

- Sort the folder contents in the DESCENDING ORDER OF TYPE.

First, We select a folder from the folder pan. Then from view menu of the menu bar. We choose arrange icon and click on the by option. We can sort the contents of that folder on DESCENDING ORDER OF TYPE.

- Sort the folder content in the descending order of last modified.

First, We select a folder form the folder pan. Then from view menu of the bar. We choose arrange icon and then we click on by date option. We can sort the contents of that folder on descending order of last modified date.

- Expand all branch of HARD DISK.

Double- clicked (L) on the HARD DISK PARTITIONS.

- Collapse all branches of HARD

DISK. Click on the CLOSE

OPTION.

- Create a folder BMC under root (HARD DISK).

Select DRIVE (C :) from explorer left pane which shows the contents of C: on the right pane right, click anywise on the right pane except on any other file or folder it shows a popup menu from. We have to choose new and then folder from the sub menu of the new. So a new folder is created and we give its name BMC.

- Open the folder BMC.

To open folder BMC, we select the BMC FOLDER from the folder pan of explorer.

- Create a text file BMC. TXT under it.

First, we open the folder BMC and then right click `anywhere on the right pane and then we select the text document & we give it the name BMCTXT.

- Make the file BMC TXT HIDDEN.

Open the folder BMC. Then right click on BMC TXT FILE, It shows a popup menu from which be have to choose properties and then hide option from its attribute and then apply.

- SHOW IT AGAIN.

Select BMC TXT from the BMC folder, right click on IT & choose puppetry option from the popup menu and click on it. If there is a right mark on the hidden attribute then click on it to make it mark free and click on apply.

- Create another folder BCOM under ROOT.

Select C: \ from the left pan of the explorer. Right click any ware on the right pan except on any folder or file. IT shows a popup menu from which we have to choose new and

then folder from the sub menu of the new. So a new folder is created and we give it the name BCOM.

- Copy the BCOM TXT FILE using shorthand menu from BMC to BCOM.

We select BMC folder. Then select BMC TXT pressing left mouse button on it and also passing control key simultaneously & we drag it to the folder BCOM in the left pane. It will copy BMC TXT from folder BMC to BCOM.

- Rename the file BMC. TXT as BMC TXT.

We select BMC folder. Then right click on BMC. TXT, we choose rename option from the popup menu and we give it the name BMC TXT.

- Delete the file BMC TXT from BMC.

To delete the file BMC TXT from BMC first, We right click on BMC TXT and then we click on delete option from the popup menu.

- Create another folder BTECH on DESKTOP. Create two folders CSE and IT under IT .

We select desktop from explorer folder pane. Right click on any ware on the right pane except on any folder or file. Choose new option from the popup menu and then click on folder and we give it name BTECH to create two folders in BTECH, First we select BTECH from left explorer pane & then we right click in the blank space of the right pane. A popup menu is displayed, from which we click the new folder option. So a new folder is created, two which we give the name cases in the same way we create another folder named it under folder BTECH.

- Copy the file BMC TXT from BCOM to BSC using menu and rename as BCOM BMC TXT.

We open BCOM folder. Then we select BMC TXT from the right pane. From edit menu we choose copy option. Then we open BSC from desktop. Again from edit menu we click paste option to rename it right click on BMC TXT, we click rename option and we give it the name BMC TXT.

- Move the file BMC TXT from BSC to BCOM using drag drop method.

We open BMC folder and the select BMC TXT. Then we left click on the file & pressing the left mouse button we drag it from folder BSC to the BCOM folder & release the left mouse button.

- Copy the file BNC TXT from BCOM to BSC using drag and drop by right mouse button.

Open the folder BCOM press right mouse button on BMC TXT drag BCOM and when we release the button it shows a popup menu from which we select copy here option.

- Copy any four consecutive files to BMC.

Selected the four files by pressing shift + arrow key and then performed the general copy-paste operation.

- Copy any four non consecutive file to BCOM folder.

We open any folder having more than four files then we left click on any file, then we press the control button from the keyboard & keeping it pressed. We select other there non consecutive files then, we release the control button and then, we press the ctrl+c buttons simultaneously. Then we open the BCOM folder & press ctrl+v.

- Delete the folder.

We select BMC folder. From file menu we click delete.

- Close the Windows Explorer.

We select File menu and then click on close option from it.

ASSINGNMENT II

- Open the previously created document.
To open the previously created document, we go to start, Programs, MS Word. When MS Word opens, we got to File menu, Open. A dialog box opens where we choose the drive, the folder where the document is located and click on the 'Open' button. The required document opens.
- Find out the word "Awards" throughout the document.
We go to Edit, Find and click. The word to be searched is asked for. We type "Awards" .The word gets highlighted in the document.
- Replace all the "Corson "with "Carson".
We go to Edit, Find and click on the Replace tab. The word to be replaced and the word to replace it with are asked for. We enter "Curzon" and "CARSON" in the respective places and click on the 'Replace All' button. All the "Curzon" get replaced with "Carson's".

- Create a bookmark according to your choice.

We select an item we want a bookmark assigned to, or click where we want to insert a bookmark. On the insert menu, click bookmark. Under Bookmark name, type or select a name. Click Add.

- Insert a page break after the first paragraph.

Click after the first paragraph, go to insert menu, Break, Choose Page Break and click 'OK'.

- Move your control to the first page of the document.

Click the Edit menu, Go, To. A window opens where we select page and type in the page number in the space provided. Click Go, To. The control moves to first page of the document.

- Move to the 7th line of the first page.

Click the Edit menu, Go, to. A window opens where we select line and type in the line number in the space provided. Click Go To. The control moves to the 7th line of the document.

- Insert the page number to the current document. Omit the first page number.

Click the Insert menu, Page Number; specify the position and alignment and click 'OK'. Page number is inserted. Again go to insert menu, Page Number click the option 'show number on first page' to unpick it and click 'OK'. The first page number is omitted.

- Insert the current item date.

- Increase the space between the characters.

Select the text you want to change. On the Format menu, click Font, and then click the Character Spacing tab. Do one of the following:-To expand or condense space evenly between all the selected characters, click Expanded or Condensed in the Spacing box, and then specify how much space you want in the by box.

- Change the line spacing between the paragraphs.

Select the paragraphs in which you want to change line spacing or paragraph spacing. On the Format menu, click Paragraph, and then click the indents and Spacing tab. Under spacing, do one of the following:- To change line spacing, select the option you want in the line spacing box. To add spacing before or after each paragraph, enter the spacing you want in the before or after box.

- Insert tab into your document according to your choice to make your document good looking:- Select the paragraph in which you want to set a tab stop. Click at the Fr left of the horizontal ruler until it changes to the type of set you want. Click the horizontal ruler where you want to set a tab stop.

- Insert a border into your document to write something as notes.

- Move to the 3rd line of record page and change that particular line to upper case

Click Edit menu, Go To, select line, type in 3 in the line number space and click on the 'go to' button. Then click on Format menu, Font and choose the 'All Caps' option. Then click 'OK'.

- Create a new document.

Go To, File menu, New, select bank document, and click 'OK'. A new document will be created.

- Type the assignment as inserting the bullets or numbering in the document.

To insert bullets, go to Format menu, Bullets and Numbering. To insert billers, select the billers tab, select the bullet and click 'OK'. To insert numbers, select the numbers tab, choose the type of numbering scheme and click 'OK'.

- Check the spelling of your document with the word's spell check.

To check the spelling of a document, go to Tools menu Spellings and grammar. The wrong spellings appear in a window. Either click 'Ignore' to do nothing to them or click 'Change' to change to the word suggested by Word. After doing this, click 'OK'.

- Display the drawing toolbar. Create a text box and a call out for writing something in the box. To display the drawing toolbar, go to the View menu and go to Tools. Under Tools, click 'drawing'. The drawing toolbar appears on the screen. To create textbox, choose textbox on the drawing toolbar and draw a box on the screen with its help. Write in the space provided.

- Using Auto correct protect your spelling mistake.

To use auto correct, go to Tools menu, Auto Correct. A window containing four tabs opens. In each of the tabs, select the nicety options and click 'OK'.

- Make a toolbar according to your need through which you can create a new document. Open an existing document. Save the document, Cut, Copy, Paste, Bold, Italic, Underline, Outside border, Line draw, Rectangle draw. Close all the toolbars and then open your created toolbar.

On the Tool menu, click Customize, and then click then click the Toolbars tab. Click new. In the Toolbar name box, type the name you want. In the make toolbar available to box, click the template or document you want to save the

toolbars in. Leave the Customize dialog box open (you might need to move it out of the way), and do one or more of the following:- To add button to the toolbar, click the commands tab. In the categories box, click a category for the command. Drag the command you want from the commands box to the toolbar. To add a built-in menu to the toolbar, click the commands tab. In the categories box, click Built-in Menus. Drag the menu you want from the commands box to the toolbar. When you have added all the buttons and menus you want, click Close. Close other toolbars and open the newly created toolbar.

- Insert Header and Footer into your document. Display the Header and Footer. Make different first page header:- To insert and footer, go to View menu, Header and Footer. A space appears for the header, write the header in it. In the header and footer window, choose any one amongst the many option available like Date and Time, Page number etc. and apply it. The header and footer are displayed. To MAKE Different first page header, go to Header and Footer under View menu, select page setup, click the Layout tab, click the Different First Page Header to tick it and click 'OK'.

- Create a new document in a two columnar from .

Open a new document, write something in it, and switch to the print Layout view. Click where new column is to start. On the insert menu, click Break. Click column break. Word moves the text that follows the insertion point to the top of the next column.

- Protect the document from illegal users.

A document can be protected from illegal users by giving it a password. To do this, open the document. On the File menu, click saves as. On the tools menu in the save as dialog box, click general option. In the password to open box, type a password, and then click OK . In the reenter password to open box, type the password again, and then click OK. Click Save.
